

Swapnel Singh

Technical Product Owner · Product Manager

reachtoswapnelsingh@gmail.com · India · [swapnels-portfolio.vercel.app](#) · [linkedin.com/in/pm-swapnisingh](#)

Technical Product Owner / Product Manager with 3+ years owning enterprise platform products at ICICI Bank, currently product owner of an internal employee-facing platform used by **~150,000 employees daily**. Owns the full product lifecycle across backlog and feature prioritization, business and technical requirement translation, API-based integrations, UAT, and release, working closely with business, operations, and engineering teams. Backed by a portfolio of self-built AI products and 0→1 product case studies.

~150K daily users, enterprise platform	~80K monthly active applicants (0→1 build)	~30% faster onboarding turnaround	3+ yrs enterprise product ownership

EXPERIENCE

Product Owner · ICICI Bank

2022 – Present

Manager, Product & Digital Transformation · enterprise workflow & onboarding platforms

- Own the **Employee Experience Platform**, ICICI Bank's enterprise workplace platform used by **~150,000 employees daily** (attendance, leave, payroll, internal mobility, approvals); own the product lifecycle and backlog end-to-end, translating business needs into user stories and acceptance criteria, prioritizing features, and driving delivery from discovery and roadmap through UAT, release, and post-launch support.
- Took **iUniverse**, the applicant-onboarding platform product, from **0→1 to scale**, growing to **~80,000 monthly active applicants**, digitizing the full pre-joining workflow (document upload, verification, background checks, and credential creation) through API-based integrations across verification and identity systems.
- Defined **Day-1 Readiness Rate** as the product North Star with a leading-metric tree to catch funnel drop-off early; drove **~30%** faster onboarding turnaround and **~25%** fewer support queries in cross-functional partnership with business, operations, and engineering teams.
- Re-architected the background-verification workflow (**Employee ID** → **Applicant ID**) so checks begin **before** employee creation, a process-optimization change that reduced operational risk and strengthened hiring governance.

PROJECTS & CASE STUDIES

- Sunday Basket · personal product.** Workflow automation (Make.com + LLM) that cut weekly meal planning from **~1 hour to under 5 minutes**.
- AI-Powered Job Search Engine · personal product.** Python engine integrating Greenhouse, Lever & Ashby ATS REST APIs with AI resume-to-job fit scoring (OpenAI, embeddings).
- ChatGPT Voice Adoption · case study.** 0→1 growth strategy for India; 75-user survey → an on-device "Privacy Mode" to remove the top adoption barrier.
- Swiggy Instamart · growth teardown.** Variant-selection funnel analysis with RICE prioritization and a 6-test experimentation plan.
- WhatsApp Business Search · product research.** User interviews, TAM/SAM/SOM sizing, and a context-aware retrieval proposal for micro-businesses.

SKILLS

Product: Product ownership · Backlog & feature prioritization (RICE) · Discovery & requirement translation · Product lifecycle management · Roadmapping · North Star & funnel metrics (AARRR) · Experimentation · User research · Stakeholder management

Delivery & process: Agile · Scrum · User stories & acceptance criteria · UAT · Release management · Cross-functional collaboration · Technical documentation · Jira · Confluence

Technical & tools: SQL · REST APIs & integrations · Postman · Python · Product analytics · Workflow automation (Make.com) · OpenAI / LLMs · Figma

EDUCATION & CERTIFICATION

B.Tech, Indian Institute of Technology (IIT) Jammu

Bachelor of Technology

NextLeap Product Management Fellowship

Product management certification
