EXPERIENCE

Product Owner — ICICI Bank

2022 – Present

Manager, Product & Digital Transformation · enterprise HR & onboarding platforms

- Own **UOTM**, ICICI Bank’s enterprise employee platform used by **~150,000 employees daily** (attendance, leave, payroll, internal mobility, referrals, approvals); lead product delivery end-to-end from discovery and roadmap to release and post-launch support.
- Took **iUniverse**, the applicant-onboarding platform, from **0→1 to scale** (up to **80,000 applicants/month**), digitizing the full pre-joining funnel — document upload, verification, background checks, credential creation, and Day-1 readiness.
- Defined **Day-1 Readiness Rate** as the product North Star and a leading-metric tree to catch funnel drop-off early; cut onboarding turnaround **~30%** and support queries **~25%** with HR, Operations, and Engineering.
- Redesigned the employee background-verification workflow (**Employee ID** → **Applicant ID**) so checks begin **before** employee creation — reducing operational risk and improving hiring governance.

SELECTED PROJECTS & CASE STUDIES

- **Sunday Basket** — **personal product**. AI weekly meal-planning automation (Make.com + LLM) that cut planning from **~1 hour to under 5 minutes** a week.
- **AI-Powered Job Search Engine** — **personal product**. Python engine integrating Greenhouse, Lever & Ashby ATS APIs with AI resume-to-job fit scoring (OpenAI, embeddings).
- **ChatGPT Voice Adoption** — **case study**. 0→1 growth strategy for India; 75-user survey → an on-device “Privacy Mode” to remove the top adoption barrier.
- **Swiggy Instamart** — **growth teardown**. Variant-selection funnel analysis with RICE prioritization and a 6-test experimentation plan.
- **WhatsApp Business Search** — **product research**. User interviews, TAM/SAM/SOM sizing, and a context-aware retrieval proposal for micro-businesses.

SKILLS

Product: Discovery · Roadmapping · Prioritization (RICE) · North Star & funnel metrics (AARRR) · Experimentation / A-B testing · User research · Jobs-to-be-Done · Stakeholder management · Agile

Technical & tools: SQL · API integrations · Python · Product analytics · Figma · Make.com · OpenAI / LLMs · No-code automation

EDUCATION & CERTIFICATION

B.Tech — Indian Institute of Technology (IIT) Jammu
Bachelor of Technology
